**NEC CODE CHANGES FOR
LINEAR FLUORESCENT PRODUCTS**

Beginning January 1, 2008, United States code (NEC) requires fluorescent luminaires using double-ended lamps to have a disconnecting means either internal or external to each luminaire with some exceptions. Beginning June 1, 2007, Canadian code (CEC) requires linear fluorescent luminaires over 150V to have a disconnect means integral with the luminaire. Please note that Prescolite products are not affected by this impending code change.

Very truly yours,

A handwritten signature in black ink that reads "Ron Newbold".

Ron Newbold
Director, New Product Development
